“Stitching 2D into 3D: An Introduction to Photogrammetry”

- Jentery Sayers | UVic English

This workshop guides participants through the use of 2D photography to produce 3D models of physical objects. Participants also have the opportunity to survey techniques for repairing, manipulating, and printing 3D models.

Thursday, April 11th | 3-4 pm | Maker Lab (TEF 243)

**register: maker@uvic.ca
open to eight participants**
